

Organizational Chart Guide

These organizational charts include all employees who supervise staff, which includes some positions that we did not consider “supervisors” in determining our countywide average span of control as they are in jobs that can supervise staff but do not require supervising staff.

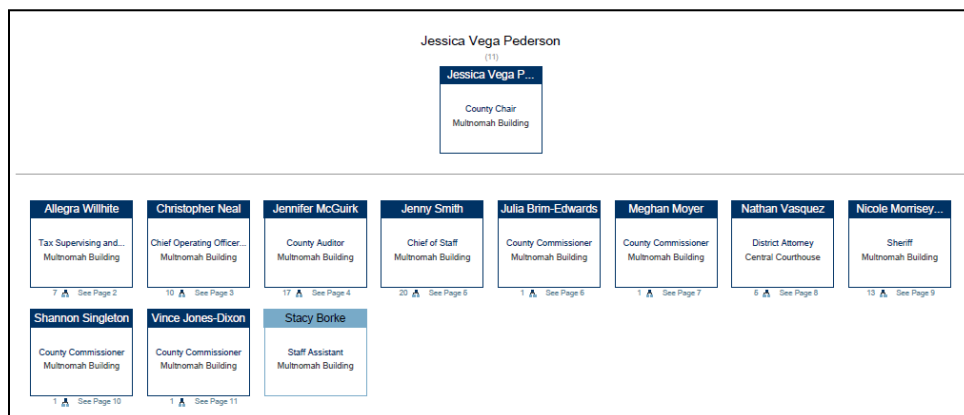

Example: Staff Assistant is broad and used for many roles, it does not require supervising staff, but positions can supervise. Because some Staff Assistants supervise, they will appear as an org chart/supervisor, but were not included in the average span of control calculation.

Navigating the PDF Version of Org Charts

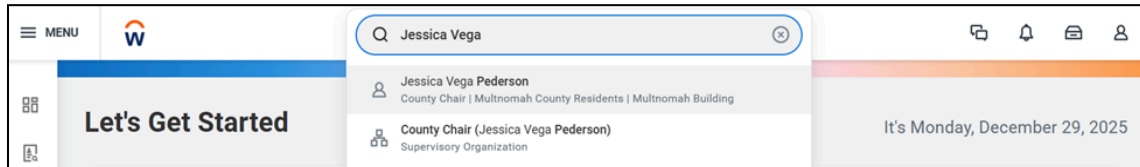

Clicking on an employee's name within this document will show you their structure. Alternatively, using the keyboard function control + f allows you to search names to find specific employees.

Dark blue boxes indicate a position has direct reports, these boxes are clickable and will bring you to the position's organizational chart. Light blue boxes are non-supervisory direct reports.

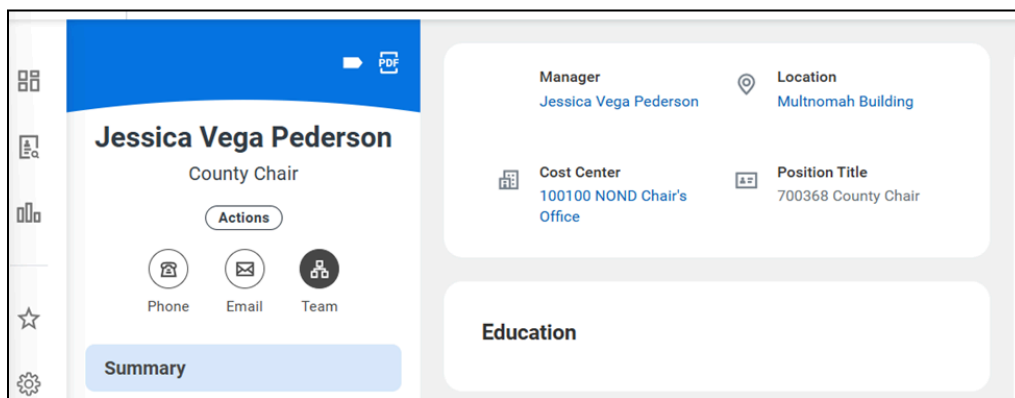

Navigating Workday for Interactive Organizational Charts

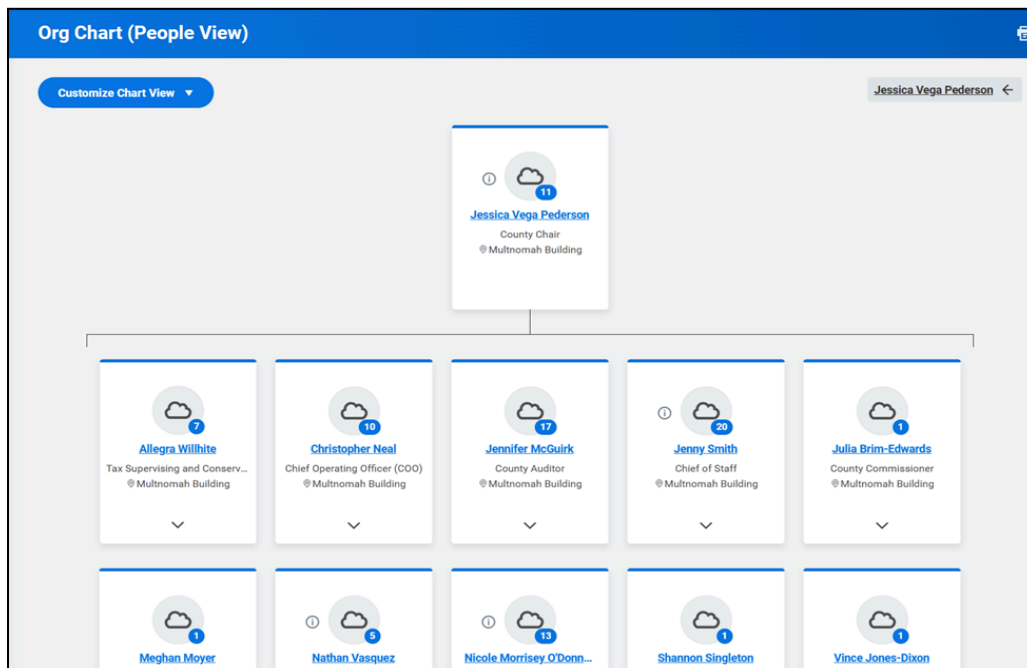

- From the [workday homepage](#), enter an employee name into the search bar and click on their name to view their workday profile.

- Once on an employee's profile, click team to view their organizational chart.

- Names with numbers next to them indicate they supervise other positions. Click on any employee box to view their organizational chart.
