Evaluation Criteria Weightings

Results From Last Meeting

Evaluation Criteria Weightings

Overview of Weighting Exercise

Long Term

- *Addresses permanent impacts and benefits. This may include permanent property acquisitions or displacements as well as impacts and benefits resulting from the project’s operations like design features that improve pedestrian and bike safety.*

Short Term

- *Addresses temporary impacts and benefits that occur only during construction and do not persist beyond the end of the construction phase (e.g., construction-related noise, or temporary easements).*

Use Code: [XXXXXX]

Note: Code will be updated on day of the event.

A stylized blue graphic of a bridge with two towers on either side. The towers have small white rectangular windows. A thick blue horizontal bar spans the width of the bridge, with two large, white, semi-circular cutouts in the center. The text 'EARTHQUAKE' is positioned above the bridge, 'READY' is inside the cutouts, and 'BURNSIDE BRIDGE' is below the bridge.

EARTHQUAKE

READY

BURNSIDE BRIDGE
