CASE FILE: T2-2025-0023 LOCATION: [13937 & 14111 NW Springville Rd. Portland](#)

Map, Tax lot: 1N1W16C-00100 & 1N1W16C-00400

Dear Land Use Planner,

I trust this correspondence finds you in good health. I am writing to articulate my profound apprehensions regarding the proposed establishment of a cellular phone tower within our community. While acknowledging the significance of enhancing connectivity and communication services, I believe it is imperative to meticulously assess the potential adverse implications that such an installation may impose on our locality.

Our community is renowned for its aesthetic charm, serenity, and unity. The installation of a cellular tower holds the potential to significantly impact the visual allure of our area and conceivably diminish property valuations for homeowners in close proximity. Furthermore, there is an escalating unease among residents concerning conceivable health risks linked to prolonged exposure to electromagnetic radiation emitted by these towers, particularly concerning vulnerable demographics such as children and the elderly.

In the submitted proposal, a comprehensive analysis specific to this locale appears to be lacking from the requesting party seeking permit authorization. We request a comprehensive disclosure of health impact assessment documents to be meticulously reviewed and shared publicly before advancing any endorsement processes.

I respectfully implore that you orchestrate a rigorous and transparent evaluation procedure, incorporating the viewpoints and concerns of the residents who will be directly impacted by this development. It would be greatly appreciated if an inclusive forum or town hall assembly could be convened, affording residents the opportunity to articulate their perspectives and voice their reservations.

Furthermore, I beseech the County to explore alternative placements for the cellular tower, taking into consideration less densely populated regions or industrial zones, thus mitigating the ramifications on residential neighborhoods.

In summation, I emphatically express my reservations and dissent regarding the establishment of this cellular tower. I earnestly entreat you and your esteemed colleagues to meticulously deliberate the advantages vis-à-vis the potential drawbacks of erecting a cellular tower within our community. Your decision will exert a lasting influence on the character of our neighborhood and the well-being of its inhabitants.

I extend my gratitude for your time and consideration. I eagerly anticipate learning about the measures being undertaken to address these concerns.

Exhibit D.14

Yours sincerely,

Sudheer Pinnamaneni
