Hello. I'm writing with regard to Case T2-2025-0023, Application for a Wireless Communication Facility at 13937 and [14111 NW Springville Rd. Portland](#). I frequently walk by this area on the wonderful trail that goes right past this land and regularly see deer, coyotes, rabbits, hawks and even a bald eagle (twice). I have tremendous concern that the construction of this cell tower would significantly displace or harm the natural habitat for these creatures and should not proceed.

Additionally, the cell tower "tree" will dwarf all of the other natural trees in the area that are half of it's designed height at best and will simply look ridiculous.

I request that a different piece of land be found that could serve the same intended purpose - or nearby residents can simply change phone carriers rather than ravage this beautiful land for the sake of corporate greed.

Thank you.
