To clarify: the section of the project related to the 34747 address does not require any of these permits. The connection at Cottrell Road does not require building or plumbing permits, but will require standard right-of-way permitting for construction. -Jesse

Subject: RE: Lusted Hill Distribution Main

Hi Lisa, I confirmed up the line with this and no building or plumbing permits, or any other permits such as street access, are required for this section of the project, which is only pipeline work with no right-of-way interaction.

Thank you -Jesse

Subject: Lusted Hill Distribution Main

Jesse,

Does the distribution main being installed up Cottrell Rd need a plumbing or other building type permit?

Does the connection of the new distribution main to the existing main on 34747 se Lusted Rd (1S4E15C-00801) require any type of plumbing permit or does it need to meet any applicable building code?
