Hello, my name is Windy Ma'at and I live at 11555 NE McLoughlin Parkway. Right near where the planned cell tower would be located. In my home resides my partner, my 10 year old son, my 16 year old son, and myself. I am writing this as a means to give my opinion and thoughts on this cell tower proposal. Moving my family out to cascade locks close to 8 years ago, this was one of the major reasons for choice of location was to be removed from the city and all of its negative draws such as pollution, noise, activity, and unnecessary radiation with the increase of 5g cell tower installations. Myself and the rest of my family are all neurodivergent and struggle with our physical health and mental health. All four of us in our home are diagnosed with autism and ADHD with my wife having those diagnoses but also including bi-polar and severe depression, as well. Both of my young sons also have ADHD and autism that affect their lives immensely. I fear that this cell tower and the potential to allow more would cause severe damage not only to our health due to the cell radiation but also exacerbate our disorders and diagnosis's further. Health and safety precautions we take to protect ourselves and home is EMF blocking(electromagnetic frequency) devices and cases to block from cell phone, tablet, Wi-Fi radiation, EMF blocking home router box, grounding sheets for beds(direct connection to earths energy to heal and shield from radiation) and various tinctures to help the nervous system and detox from heavy metals. These are just some of the steps that we have taken to protect our family. With all of these cautions and preventives in place there has been a significant improvement to the health and well-being of my family. Especially the behavior of my children. My wife is unable to work due to her physical and mental health from her disorders. So bad to the point she is in and out of the hospital constantly due to her mental health. I fear that if this proposal is allowed to pass that my family and I will suffer from what we ultimately know the risks and consequences will be to our mental and physical health. We are very low income with no means of being able to relocate anywhere else. This cell tower(s) will be a stone throw away from our home, completely canceling out and engulfing everything we do as a family and home to protect our health and well-being. The passing of this proposal to install these cell towers at this location is something that we do not support or encourage for not only the health and safety of ourselves and neighbors but for the ecosystem/nature of this beautiful area. I ask that the health and well-being of my family and neighbors be highly considered when making this decision. I am also curious to know if there has been any research or discussions within the building of this proposal as to the potential negative consequences of installing these towers that directly affect the residents and environment. So with this letter I ask that you please reconsider the installation of these towers in our neighborhood. I speak in representation of my family and myself but also for those without the means, voice or knowledge to speak up against this themselves. We do not support this decision. Thank you for your time and reading this. It is greatly appreciated.
