To Whom it May Concern,

My name is Andrea Culver. My family and I live .4 miles south of the Bull Run Water filtration site. While we have experienced many issues stemming from the construction, one that is constant is the lighting at night. My daughters have experienced sleep issues and nightmares because of the intense light that pours in to their bedroom window. Some nights it has seemed that there was extra strong floodlights pointed in our direction. Living out in the country, where there is little to no light noise, this change has been felt intensely. It took us awhile to figure out the source of my daughters' sleep issues. We were led to believe that even during construction the dark sky qualifications would be enforced. That definitely has not been the case.

While it is difficult to photograph just how bright it is, I have three photos taken on three different nights. I apologize for the quality of photos.

Thank you,  
Andrea Culver
