Subject: Supplemental Information
Re: Land Use Permitting

Dear Jesse:

I have reviewed the condition in the Multnomah County Staff Memorandum at I.45 that requires an alternative treatment technology system in place of the original septic system identified in the project application materials. Provided the drain field for the alternative treatment technology system is in the same location and is equal in size to or smaller than the original drain field design, my conclusion in the July 26, 2023 land use permitting letter (Exhibit I.66) that the drain field is not anticipated to have a negative effect on the slope stability remains unchanged.

Sincerely,

Yuxin Lang
