**Question 2: Library Security**

**Commissioner Meieran (District 1):** The table above breaks out the \$3.0 million in security spending by program offer in FY 2024. This total is not exhaustive, but captures hard costs directly related to library security. Responses to additional questions below:

- Number of library safety liaisons  
The library has a total of 19.50 FTE library safety liaisons. As part of our hybrid approach, savings from vacant positions are utilized to fund on site contracted security costs.
- Number of incidents, type of incidents, by location size.  
The following tables provide a month-by-month trend of security incidents by location. The library rules were updated in March 2023; we are sharing March 2022 - February 2023 information so the data is directly comparable across months.
- Update on the specialized software.

The library's current system is called the Security Incident Reporting (SIR) system. This is a home-grown solution that is not easily used for real time reporting or robust analytics, and requires updating. The library will evaluate whether a module of the [Origami](#) system (in implementation Countywide for RSK-3 administrative procedures) will meet library security reporting needs, with the added benefit of integrating into an approved Countywide system. We estimate the upfront costs for implementation to be \$60,000. Ongoing costs are estimated at \$20,000, and are incorporated into our base budget as support costs for the existing SIR system.

## Library security program

- FY24 budget: \$3M
- Hybrid approach
- Completed equity review of library rules and implemented revised rules in March 2023.
  - Reduced number of rules from 27 to 10.

The Multnomah County Library security incident trend data below is derived from Security Incident Reporting system for the 12 months ending February, 2023. Information pulled after February 2023 is not directly comparable, since changes to Library Rules were rolled out systemwide in March 2023.
