Treasury Group

To: Jessica Vega Pederson - Chair, Board of County Commissioners
Investment Advisory Board Members (IAB)
Eric Arellano - Chief Financial Officer
Jennifer McGuirk - County Auditor

From: Jeff DeCosta, County Treasury

Date: September 30, 2026

Re: Investment Portfolio Results for August 2026

The County Investment Pool's annualized earnings rate for August was 3.87%. This was a three basis point increase from the previous month's return of 3.84%. The year-to-date rate of return for Fiscal Year 2027 is 3.85%.

The U.S. Treasury 90-day T-Bill yield at the end of August was 3.91%. An eight basis point increase from the end of July.

The current yield for the State's Local Government Investment Pool is 4.10%.

Total nonfarm payroll employment increased by 162k jobs in August, with the unemployment rate unchanged at 4.1%. The US annual inflation rate decreased to 3.4% in August. The Federal Reserve raised its benchmark interest rate by 25 basis points to a target range of 3.75% to 4.00% on September 16th.

Month End Commentary - August 2026

Global bond yields continued their ascent in August while equity markets jumped back on their feet after stumbling in July. The S&P 500 index advanced by 2.7% for the month as the AI trade reestablished momentum and was further bolstered by solid corporate earnings. Treasury yields climbed for a sixth consecutive month with the policy-influenced 2-year tenor rising by 5 basis points to 4.34%, while 10-year yields rose by a basis point to 4.75%.

Yields began the month following oil prices lower on what seemed to be constructive negotiations with Iran to de-escalate the ongoing conflict and were further suppressed when the initial July non-farm payrolls report showed the economy shed 23 thousand jobs. However, the downward trend observed in the first half of August quickly reversed as negotiations stalled, sending oil prices higher, while price data released in August showed little to no progress on inflation, prompting Fed officials to voice their discontent. Additionally, concern over fiscal trajectories and global supply sent 30-year yields to their highest levels in nearly two decades prompting the Treasury to intervene. To cap it all off, Fed Chair Kevin Warsh delivered a speech at the Fed's annual Jackson Hole Symposium which markets interpreted as laying the groundwork for potential rate hikes.

Inflation has remained above the Fed's 2% target for five and a half years and recent prints have not been encouraging. The Fed-favored PCE gauge advanced by 3.7% in July while the core deflator, which strips out volatile food and energy prices, advanced by 3.3%. The labor market strengthened significantly in August with non-farm payrolls broadly advancing by an outsized 162 thousand while July was revised upward to a gain of 21 thousand. The stall in disinflation coupled with a strong job market has led officials to express support for tighter policy with Fed funds futures markets pricing in 60% odds of a rate hike at the upcoming FOMC meeting slated for September 16th. The Fed will get one more read on inflation with the August CPI and PPI reports due out before it meets, data that will prove pivotal to the near-term path of interest rates.

Short-dated maturities continued their outperformance in August while credit spreads tightened modestly as corporates outperformed Treasuries and agency debt. Spreads on agency and taxable municipal debt remain tight relative to historical averages leading us to be selective while robust corporate issuance has presented some opportunities to add ultra-high-quality corporates for those whose policies allow. We are constructive on current yield levels and advise clients to manage portfolio durations neutral to respective benchmarks to anchor portfolio earnings while maintaining a laddered position on the curve to provide for ongoing reinvestment opportunities amid heightened market volatility.

This report is for general informational purposes only and is not intended to provide specific advice or recommendations. Government Portfolio Advisors (GPA) is an investment advisor registered with the Securities and Exchange Commission and is required to maintain a written disclosure statement of our background and business experience.

Questions About an Account: GPA's monthly & quarterly reports are intended to detail the investment advisory activity managed by GPA. The custodial bank maintains the control of assets and settles all investment transactions. The custodial statement is the official record of security and cash holdings and transactions. GPA recognizes that clients may use these reports to facilitate record keeping and that the custodial bank statement and the GPA report should be reconciled, and differences documented.

Trade Date versus Settlement Date: Many custodial banks use settlement date basis and post coupons or maturities on the following business days when they occur on weekend. These items may result in the need to reconcile due to a timing difference. GPA reports are on a trade date basis in accordance with GIPS performance standards. GPA can provide all account settings to support the reason for any variance.

Bank Deposits and Pooled Investment Funds Held in Liquidity Accounts Away from the Custodial Bank are Referred to as Line Item Securities: GPA relies on the information provided by clients when reporting pool balances, bank balances and other assets that are not held at the client's custodial bank. GPA does not guarantee the accuracy of information received from third parties. Balances cannot be adjusted once submitted however corrective transactions can be entered as adjustments in the following months activity. Assets held outside the custodial bank that are reported to GPA are included in GPA's oversight compliance reporting and strategic plan.

Account Control: GPA does not have the authority to withdraw or deposit funds from or to any client's custodial account. Clients retain responsibility for the deposit and withdrawal of funds to the custodial account. Our clients retain responsibility for their internal accounting policies, implementing and enforcing internal controls and generating ledger entries or otherwise recording transactions.

Custodial Bank Interface: Our contract provides for the ability for GPA to interface into our client's custodial bank to reconcile transactions, maturities and coupon payments. The GPA client portal will be available to all clients to access this information directly at any time.

Market Price: Generally, GPA has set all securities market pricing to match custodial bank pricing. There may be certain securities that will require pricing override due to inaccurate custodial bank pricing that will otherwise distort portfolio performance returns. GPA may utilize Refinitiv pricing source for commercial paper, discount notes and supranational bonds when custodial bank pricing does not reflect current market levels. The pricing variances are obvious when market yields are distorted from the current market levels.

Performance Calculation: Historical returns are presented as time-weighted total return values and are presented gross and net of fees.

Amortized Cost: The original cost on the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the date of the report. Discounts or premiums are amortized on a straight-line basis on all securities. This can be changed at the client's request.

Callable Securities: Securities subject to redemption in whole or in part prior to the stated final maturity at the discretion of the security's issuer are referred to as "callable". Certain call dates may not show up on the report if the call date has passed or if the security is continuously callable until maturity date. Bonds purchased at a premium will be amortized to the next call date while all other callable securities will be amortized to maturity. If the bond is amortized to the call date, amortization will be reflected to that date and once the call date passes, the bond will be fully amortized.

Duration: The duration is the effective duration. Duration on callable securities is based on the probability of the security being called given market rates and security characteristics.

Benchmark Duration: The benchmark duration is based on the duration of the stated benchmark that is assigned to each account.

Rating: Information provided for ratings is based upon a good faith inquiry of selected sources, but its accuracy and completeness cannot be guaranteed.

Coupon Payments and Maturities on Weekends: On occasion, coupon payments and maturities occur on a weekend or holiday. GPA's report settings are on the accrual basis so the coupon postings and maturities will be accounted for in the period earned. The bank may be set at a cash basis, which may result in a reconciliation variance.

Cash and Cash Equivalents: GPA has defined cash and cash equivalents to be cash, bank deposits, LGIP pools and repurchase agreements. This may vary from your custodial bank which typically defines cash and equivalents as all securities that mature under 90 days. Check with your custodial bank to understand their methodology.

Account Settings: GPA has the portfolio settings at the lot level, if a security is sold our setting will remove the lowest cost security first. First-in-first-out (FIFO) settings are available at the client's request.

Historical Numbers: Data was transferred from GPA's legacy system, however, variances may exist from the data received due to a change of settings on Clearwater. GPA is utilizing this information for historical return data with the understanding the accrual settings and pricing sources may differ slightly.

Financial Situation: In order to better serve you, GPA should be promptly notified of any material change in your investment objective or financial situation.

No Guarantee: The securities in the portfolio are not guaranteed or otherwise protected by GPA, the FDIC (except for non-negotiable certificates of deposit) or any government agency. Investment in securities involves risks, including the possible loss of the amount invested.
