Date: January 18, 2024

Re: Investment Portfolio Results for December 2023

The County Investment Pool's annualized earnings rate for December was 3.64%. This was a fifteen basis point decrease from the previous month's return of 3.79%. The year-to-date rate of return for Fiscal Year 2024 is 3.24%.

The U.S. Treasury 90-day T-Bill yield at the end of December was 5.40%. A five basis point decrease from the end of November.

The current yield for the State's Local Government Investment Pool is 5.00%.

Total nonfarm payroll employment increased by 216k jobs in December, with the unemployment rate holding at 3.7%. December hiring came mostly from government and healthcare. The December jobs report adds uncertainty to the Fed's plans. The Fed is expected to start cutting rates at some point this year, perhaps not as soon as the market was expecting.

Month End Commentary - December 2023

Interest rates continued their descent in December with the two-year Treasury note falling by 43 basis points while the ten-year note dropped by 45 basis points to finish at the very level it began the year. The continuation of the rally in fixed income markets was supported by more evidence that the current disinflationary trend remains intact and by a Federal Reserve who, out of their latest meeting, are forecasting multiple rate cuts in 2024. Equities as measured by the S&P 500 continued their holiday rally advancing by 4.4% in December, bringing the 2023 gain to an impressive 24%.

Price data released in December showed that inflation continued to moderate with the headline PCE deflator decelerating to an annual rate of 2.6% while the Fed preferred core PCE deflator, which strips out volatile food and energy prices, trimmed its annual advance to 3.2%. The November inflation prints are still above the 2% annual rate that the Fed deems stable, however, the disinflationary trend appears to have momentum with core PCE running at annual rate of 1.9% over the past six months. The trend has been driven primarily by goods as several categories have experienced outright deflation for consecutive months. Prices for services, which are naturally stickier, and more influenced by labor costs, have been slower to moderate but have shown recent progress advancing by 0.2% for a second consecutive month after October's robust 0.5% advance.

Labor markets remained resilient through the end of the year adding a more than expected 216 thousand workers to non-farm payrolls in December. The headline number showcased ongoing strength however, the underlying details were not as supportive. The prior two months were revised downward by a combined 71 thousand jobs and the December household survey resulted in the largest decrease in employment since April of 2020. Further, the duration of unemployment spiked while participation fell by the most in almost three years. Average hourly earnings advanced by 0.4% in December, which is considered fast for the Fed, but it should be noted that the figure received a boost from the recently negotiated UAW labor contract. With reduced hours worked, and other factors displaying softness in the labor market, recent wage gains are unlikely to stoke a reacceleration of price levels – though the Fed will be closely monitoring as any persistently elevated readings could dampen the disinflationary trend in place.

With the Fed expected to loosen monetary policy in 2024, we continue to advise clients to be neutral to long duration relative to strategic targets. We remain neutral on credit and continue to see ample supply in agency markets where spreads have tightened yet remain at attractive levels.

This report is for general informational purposes only and is not intended to provide specific advice or recommendations. Government Portfolio Advisors (GPA) is an investment advisor registered with the Securities and Exchange Commission and is required to maintain a written disclosure statement of our background and business experience.

Questions About an Account: GPA's monthly & quarterly reports are intended to detail the investment advisory activity managed by GPA. The custodial bank maintains the control of assets and settles all investment transactions. The custodial statement is the official record of security and cash holdings and transactions. GPA recognizes that clients may use these reports to facilitate record keeping and that the custodial bank statement and the GPA report should be reconciled, and differences documented.

Trade Date versus Settlement Date: Many custodial banks use settlement date basis and post coupons or maturities on the following business days when they occur on weekend. These items may result in the need to reconcile due to a timing difference. GPA reports are on a trade date basis in accordance with GIPS performance standards. GPA can provide all account settings to support the reason for any variance.

Bank Deposits and Pooled Investment Funds Held in Liquidity Accounts Away from the Custodial Bank are Referred to as Line Item Securities: GPA relies on the information provided by clients when reporting pool balances, bank balances and other assets that are not held at the client's custodial bank. GPA does not guarantee the accuracy of information received from third parties. Balances cannot be adjusted once submitted however corrective transactions can be entered as adjustments in the following months activity. Assets held outside the custodial bank that are reported to GPA are included in GPA's oversight compliance reporting and strategic plan.

Account Control: GPA does not have the authority to withdraw or deposit funds from or to any client's custodial account. Clients retain responsibility for the deposit and withdrawal of funds to the custodial account. Our clients retain responsibility for their internal accounting policies, implementing and enforcing internal controls and generating ledger entries or otherwise recording transactions.

Custodial Bank Interface: Our contract provides for the ability for GPA to interface into our client's custodial bank to reconcile transactions, maturities and coupon payments. The GPA client portal will be available to all clients to access this information directly at any time.

Market Price: Generally, GPA has set all securities market pricing to match custodial bank pricing. There may be certain securities that will require pricing override due to inaccurate custodial bank pricing that will otherwise distort portfolio performance returns. GPA may utilize Refinitiv pricing source for commercial paper, discount notes and supranational bonds when custodial bank pricing does not reflect current market levels. The pricing variances are obvious when market yields are distorted from the current market levels.

Performance Calculation: Historical returns are presented as time-weighted total return values and are presented gross and net of fees.

Amortized Cost: The original cost on the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the date of the report. Discounts or premiums are amortized on a straight-line basis on all securities. This can be changed at the client's request.

Callable Securities: Securities subject to redemption in whole or in part prior to the stated final maturity at the discretion of the security's issuer are referred to as "callable". Certain call dates may not show up on the report if the call date has passed or if the security is continuously callable until maturity date. Bonds purchased at a premium will be amortized to the next call date while all other callable securities will be amortized to maturity. If the bond is amortized to the call date, amortization will be reflected to that date and once the call date passes, the bond will be fully amortized.

Duration: The duration is the effective duration. Duration on callable securities is based on the probability of the security being called given market rates and security characteristics.

Benchmark Duration: The benchmark duration is based on the duration of the stated benchmark that is assigned to each account.

Rating: Information provided for ratings is based upon a good faith inquiry of selected sources, but its accuracy and completeness cannot be guaranteed.

Coupon Payments and Maturities on Weekends: On occasion, coupon payments and maturities occur on a weekend or holiday. GPA's report settings are on the accrual basis so the coupon postings and maturities will be accounted for in the period earned. The bank may be set at a cash basis, which may result in a reconciliation variance.

Cash and Cash Equivalents: GPA has defined cash and cash equivalents to be cash, bank deposits, LGIP pools and repurchase agreements. This may vary from your custodial bank which typically defines cash and equivalents as all securities that mature under 90 days. Check with your custodial bank to understand their methodology.

Account Settings: GPA has the portfolio settings at the lot level, if a security is sold our setting will remove the lowest cost security first. First-in-first-out (FIFO) settings are available at the client's request.

Historical Numbers: Data was transferred from GPA's legacy system, however, variances may exist from the data received due to a change of settings on Clearwater. GPA is utilizing this information for historical return data with the understanding the accrual settings and pricing sources may differ slightly.

Financial Situation: In order to better serve you, GPA should be promptly notified of any material change in your investment objective or financial situation.

No Guarantee: The securities in the portfolio are not guaranteed or otherwise protected by GPA, the FDIC (except for non-negotiable certificates of deposit) or any government agency. Investment in securities involves risks, including the possible loss of the amount invested.
