Date: April 23, 2024

Re: Investment Portfolio Results for March 2024

The County Investment Pool's annualized earnings rate for March was 3.64%. This was a seven basis point decrease from the previous month's return of 3.71%. The year-to-date rate of return for Fiscal Year 2024 is 3.38%.

The U.S. Treasury 90-day T-Bill yield at the end of March was 5.46%. A one basis point increase from the end of February.

The current yield for the State's Local Government Investment Pool is 5.20%.

Total nonfarm payroll employment increased by 303k jobs in March, well above the 200k estimate. The unemployment rate edged lower to 3.8%. Markets expect interest rates to hold steady at the FOMC meeting on May 1. Inflation data has caused some concern that the transition to an annual 2% inflation rate will take longer than anticipated.

Month End Commentary - March 2024

Yields were little changed in March as showcased by the two-year Treasury note which despite trading in a 25-basis point range, finished unchanged at 4.62% while the five-year tenor decreased by 3 basis points to end the month at 4.21%. Driving the intra-month action was another round of robust labor market and inflation data that initially drove yields higher before Fed Chair Powell was able smooth talk yields back down in his presser that followed the second FOMC meeting of the year. Equities as measured by the S&P 500 index climbed higher for the fifth consecutive month advancing by 3.1% and clocking a commendable 10.2% return in Q1.

The job market continued to display strength in March with non-farm payrolls showing an additional 303 thousand workers being added to payrolls beating consensus expectations for 214 thousand. Net revisions to the prior two months also added another 22 thousand jobs however, this comes on the heels of January's massive, downward revision of 124 thousand released last month. The headline payroll data is still running hot relative to what the Fed would like to observe but they did receive some good news from the report that showed wages continuing to moderate on a year over year basis, and participation increase, both of which could be signs that the labor market is coming into better balance.

Price data for February showed that the Fed's ongoing fight against inflation very well may extend into extra innings as both CPI and PPI came in hotter than expected. PCE came in line with expectations and saw its core deflator decelerate to an annual rate of 2.8%, which is down from 2.9% but marks the smallest decrease in three years. Meanwhile, headline PCE saw a reacceleration from 2.4% to 2.5%. Fed members responded to the data in a poised manner acknowledging the recent momentum shift but were quick to point out the naturally bumpy path that disinflation often takes. Members may have also drawn confidence from February's "supercore" PCE print, which after accelerating for three consecutive months, advanced at a more comfortable monthly rate of 0.18% in February, down from the outsized 0.66% observed in January. Supercore inflation measures prices for core services excluding energy and housing and is considered more sensitive to trends in the labor market and wage pressure.

The Fed remains inclined to begin lowering interest rates in 2024 as they view policy sufficiently restrictive to dampen growth and contain inflation. Market participants, on the other hand, have changed their tune considerably with fed funds futures pricing now depicting less than three rate cuts in 2024, a far cry from the six that were priced in at the beginning of the year. With spreads still suppressed and yields hovering near multi-decade highs, we continue to be bullish on duration and elect to be careful when adding spread products into portfolios.

This report is for general informational purposes only and is not intended to provide specific advice or recommendations. Government Portfolio Advisors (GPA) is an investment advisor registered with the Securities and Exchange Commission and is required to maintain a written disclosure statement of our background and business experience.

Questions About an Account: GPA's monthly & quarterly reports are intended to detail the investment advisory activity managed by GPA. The custodial bank maintains the control of assets and settles all investment transactions. The custodial statement is the official record of security and cash holdings and transactions. GPA recognizes that clients may use these reports to facilitate record keeping and that the custodial bank statement and the GPA report should be reconciled, and differences documented.

Trade Date versus Settlement Date: Many custodial banks use settlement date basis and post coupons or maturities on the following business days when they occur on weekend. These items may result in the need to reconcile due to a timing difference. GPA reports are on a trade date basis in accordance with GIPS performance standards. GPA can provide all account settings to support the reason for any variance.

Bank Deposits and Pooled Investment Funds Held in Liquidity Accounts Away from the Custodial Bank are Referred to as Line Item Securities: GPA relies on the information provided by clients when reporting pool balances, bank balances and other assets that are not held at the client's custodial bank. GPA does not guarantee the accuracy of information received from third parties. Balances cannot be adjusted once submitted however corrective transactions can be entered as adjustments in the following months activity. Assets held outside the custodial bank that are reported to GPA are included in GPA's oversight compliance reporting and strategic plan.

Account Control: GPA does not have the authority to withdraw or deposit funds from or to any client's custodial account. Clients retain responsibility for the deposit and withdrawal of funds to the custodial account. Our clients retain responsibility for their internal accounting policies, implementing and enforcing internal controls and generating ledger entries or otherwise recording transactions.

Custodial Bank Interface: Our contract provides for the ability for GPA to interface into our client's custodial bank to reconcile transactions, maturities and coupon payments. The GPA client portal will be available to all clients to access this information directly at any time.

Market Price: Generally, GPA has set all securities market pricing to match custodial bank pricing. There may be certain securities that will require pricing override due to inaccurate custodial bank pricing that will otherwise distort portfolio performance returns. GPA may utilize Refinitiv pricing source for commercial paper, discount notes and supranational bonds when custodial bank pricing does not reflect current market levels. The pricing variances are obvious when market yields are distorted from the current market levels.

Performance Calculation: Historical returns are presented as time-weighted total return values and are presented gross and net of fees.

Amortized Cost: The original cost on the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the date of the report. Discounts or premiums are amortized on a straight-line basis on all securities. This can be changed at the client's request.

Callable Securities: Securities subject to redemption in whole or in part prior to the stated final maturity at the discretion of the security's issuer are referred to as "callable". Certain call dates may not show up on the report if the call date has passed or if the security is continuously callable until maturity date. Bonds purchased at a premium will be amortized to the next call date while all other callable securities will be amortized to maturity. If the bond is amortized to the call date, amortization will be reflected to that date and once the call date passes, the bond will be fully amortized.

Duration: The duration is the effective duration. Duration on callable securities is based on the probability of the security being called given market rates and security characteristics.

Benchmark Duration: The benchmark duration is based on the duration of the stated benchmark that is assigned to each account.

Rating: Information provided for ratings is based upon a good faith inquiry of selected sources, but its accuracy and completeness cannot be guaranteed.

Coupon Payments and Maturities on Weekends: On occasion, coupon payments and maturities occur on a weekend or holiday. GPA's report settings are on the accrual basis so the coupon postings and maturities will be accounted for in the period earned. The bank may be set at a cash basis, which may result in a reconciliation variance.

Cash and Cash Equivalents: GPA has defined cash and cash equivalents to be cash, bank deposits, LGIP pools and repurchase agreements. This may vary from your custodial bank which typically defines cash and equivalents as all securities that mature under 90 days. Check with your custodial bank to understand their methodology.

Account Settings: GPA has the portfolio settings at the lot level, if a security is sold our setting will remove the lowest cost security first. First-in-first-out (FIFO) settings are available at the client's request.

Historical Numbers: Data was transferred from GPA's legacy system, however, variances may exist from the data received due to a change of settings on Clearwater. GPA is utilizing this information for historical return data with the understanding the accrual settings and pricing sources may differ slightly.

Financial Situation: In order to better serve you, GPA should be promptly notified of any material change in your investment objective or financial situation.

No Guarantee: The securities in the portfolio are not guaranteed or otherwise protected by GPA, the FDIC (except for non-negotiable certificates of deposit) or any government agency. Investment in securities involves risks, including the possible loss of the amount invested.
