Inmate Distribution by Type of Bed Occupancy, September 2008 (Total inmates housed=3,891)

¹ This data sheet is provided mainly to meet the reporting requirements as specified in one of the FY 2008 Budget Notes.

² This represents 95.3% of total County operational jail bed capacity (N=1539). Capacity at 97% or higher is considered a Population Emergency. In-transit bookings were excluded from the total bed use calculation.

³ This number does not include 24 non-exclusive USM beds that were reported in other categories.

⁴ The number of billed USM beds is a result of negotiation and data reconciliation between the County and US Marshal's office. It may not be the same number as pulled out from the DSS-J system.

⁵ Started in May 2008, this number also includes any combinations of post-prison, parole, or probation supervision violation holds that were previously grouped in the 'Multiple Holds' category.

⁶ FBWR participants include new admission, new termination, or admitted previously but still active by the end of month.

⁷ DSSJ and OJIN data were used to calculate CANS FTA outcomes. Persons in custody at time of hearing were excluded.

⁸ Beds used for SB1145 (based on primary offenses) and BM11 (based on primary offenses) were counted first regardless other types of holding an inmate might also have.
