An Earthquake Ready Burnside Bridge

Get involved and help decide the future of this bridge!

Work is underway to decide how we can create a resilient and safe Burnside Bridge and ensure we have a river crossing in downtown Portland that will withstand a major earthquake. We need your feedback as the project enters the Environmental Review phase.

Join the conversation online

Visit our online open house through Oct. 4 to learn about and share your thoughts on:

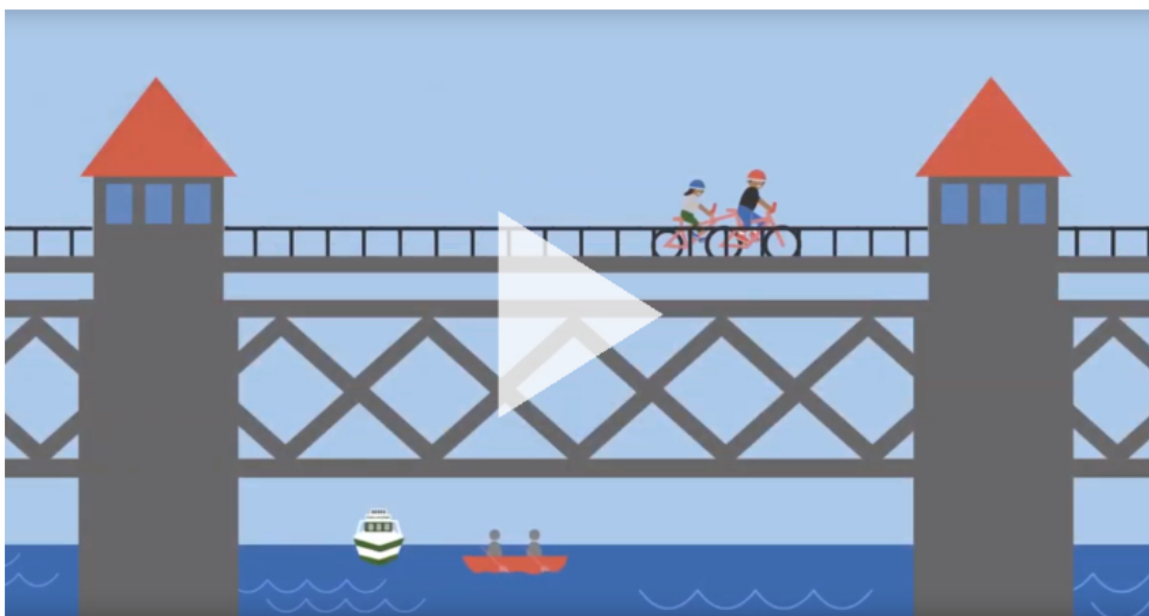

- Bridge alternatives.
- Street space: how the travel lane widths on the bridge can be designed to best serve people walking, biking, taking transit, and driving in the future.
- Traffic management during construction.
- Evaluation criteria that will help determine a preferred bridge alternative for construction.
