CAPTION: Fluoridation of Portland drinking water supply

QUESTION: Shall Portland fluoridate its drinking water supply?

SUMMARY:

Portland supplies drinking water to city residents and businesses and to several other municipalities and water districts outside Portland. Portland currently does not add fluoride to its drinking water supply.

This measure requires Portland to fluoridate Portland's drinking water supply. The measure requires fluoridation at the levels recommended by the Centers for Disease Control and Prevention or the Oregon Health Authority intended to reduce tooth decay and promote oral health. The measure is a referral of an Ordinance adopted by the Council. Although the Ordinance requires fluoridation of Portland's drinking water supply by March 1, 2014, the actual date of implementation of fluoridation will depend on the effective date of this measure. The fluoride must meet standards of the American Water Works Association. The measure requires record-keeping related to quantities of water treated and the type and amounts of fluoride used. The measure also requires the City to conduct tests for fluoride in treated and untreated water in accordance with state and federal recommendations.

The measure funds fluoridation through water user fees.
