Project Background

- **County applied for and was awarded a Safe Routes to School Grant**

- This grant opens every other year and is scored based on certain criteria. The goal is to create safer routes near schools.
- The minimum funding request is \$60K, maximum is \$3M. (This grant limit was \$2M.)
- County received about \$2M for this project. ODOT will cover about 75% of the project cost up to the grant amount.
- This project will install missing sidewalk on the west side of 223rd and add bikes lanes on both sides of the road for a safer commute from 223rd to Fairview Elementary School.
- There was more design included for this project but it had to be scaled down due to the amount of grant funds awarded.

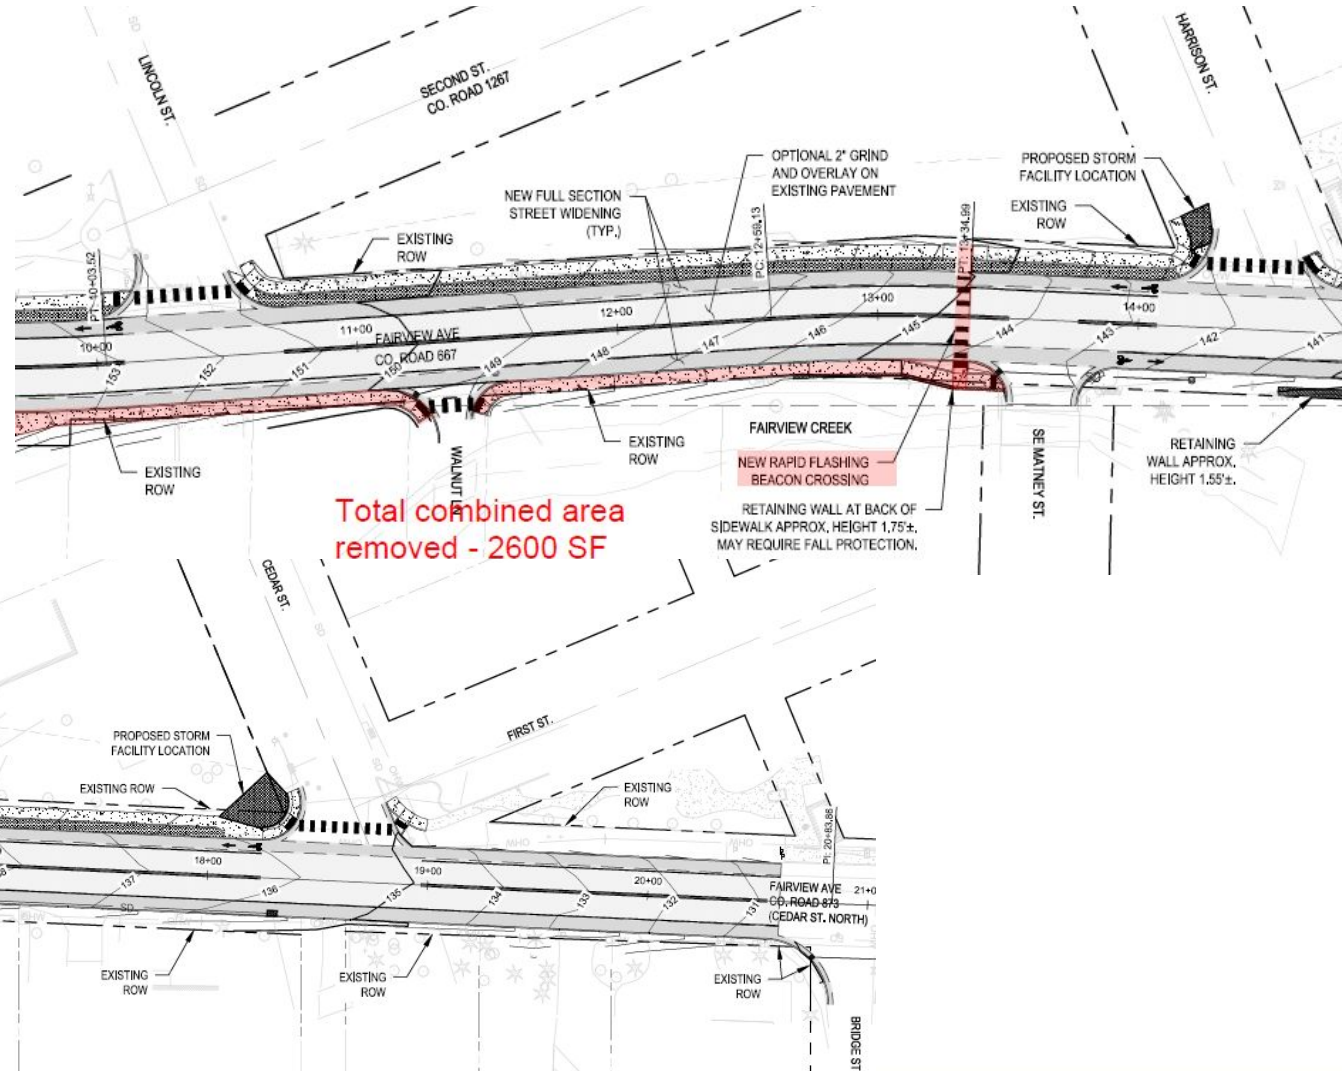

- **Multnomah County ADA Transition Plan**

- This project will replace ADA ramps that are included in the overall ADA transition plan.

Design Overview

- Bikes lanes
- ADA ramps
- Sidewalks
- Water Quality Treatment

New Apartment Connection

Sidewalk @ Lincoln St

Current Google View @ Matney St

Sidewalk Connection @ Cedar St

Sidewalk Connection @ Cedar St

Project end @ Bridge St

Schedule

- **Design & ROW – Through Spring 2026**
 - Land/road survey was updated and design is beginning now.
 - A preliminary design was included in the grant so it needs to be updated and details finalized.
 - ROW will be needed for at least Temp Construction Easements. Possibly more depending on the water quality options.
- **Construction - Summer 2026**
 - Currently working up to 30% design package. Scheduled to be submitted in about a month.
 - Grant funds are available for 5 years after execution which was 2023 so they will be available until 2028.
- **Public Outreach**
 - Website to have regular updates as needed - News releases for Traffic
 - Mailer to go out prior to construction to neighborhood
 - Flyers at community events
 - Present at meetings throughout the life of the project as requested
