2028-30 Regional Flexible Funds Allocation (RFFA): Step 1A.1 Draft Bond Scenarios & Step 2 Evaluation Draft Results

EMCTC TAC March 5, 2025

Step 1A.1: New Project Bond

How we got here

Nomination Period

 Nominations received of interest: Earthquake Ready Burnside Bridge

Eligibility Screening

Candidate Project Evaluation

Bond Scenarios Concepts and Themes Input

Draft Bond Scenarios

- Five unconstrained; mix across nine projects
- Eight constrained; mix across five projects

Input, input, input + Program Direction

Draft Bond Scenario: Allocation Approach

Approach to Bond Proceed Allocation:

- Utilize up to \$84 million
- Investment into all five candidate projects
 - No candidate at full requested amount
- At levels to support project advancement
 - Project team conversations informed milestones
- Reviewed previous allocations to similar projects
- Similar investment levels for new transit categories

Draft Bond Scenario

Candidate Project	Allocation	Activity	Description
82 nd Avenue Transit Project	\$24 million	Construction	Construct a new FX transit line with increased frequency, pedestrian access enhancements, transit vehicle priority, and other amenities and features.
Tualatin Valley Highway Transit Project	\$27.5 million	Construction	Construct a new FX transit line with increased frequency, pedestrian access enhancements, transit vehicle priority, and other amenities and features.
Montgomery Park Streetcar Extension	\$10 million	Construction	A 1.3 mile extension of the existing Portland Streetcar North-South (NS) Line to Montgomery Park in Northwest Portland with multimodal extensions of area streets and rehabilitation of NW 23rd Avenue.

Draft Bond Scenario

Candidate Project	Allocation	Activity	Description			
Burnside Bridge Transit Access and Vehicle Priority Project	\$10 million	Construction	Construct a dedicated eastbound bus-only lane on the bridge with a bus dwell area and preserve right-of-way to accommodate future streetcar operations as part of the replaced seismic upgraded Burnside Bridge.			
Sunrise Gateway Corridor Project	\$12.5 million	Project Development	Complete Sunrise Gateway Highway NEPA re-evaluation. Complete 20% design of the Sunrise Gateway Highway from 122 nd to 172 nd . Build off 20% design for Stage 1: Safety and Local Connections on Highway 212/224 between 135 th and 152 nd to complete Design Acceptance Package.			

Step 2: Technical Evaluation Draft Results

How we got here

Pre-Application

Nomination Period

- Application assistance
- Total 24 applications; 3 from E. Multnomah County

Technical Evaluations

- Outcomes Evaluation: Advancement of RTP goals + consistency with regional design guidelines
- Project Delivery Risk Assessment

Q

Outcomes Evaluation Methods

(see Attachment 1 - Draft Report & Appendix 2)

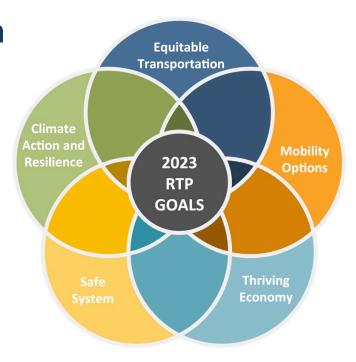

Overarching Methodology

Separate evaluation for application types

- Project Development
- Construction

Evaluation Areas: 5 RTP goals + design

- Not weighted
- Design not assessed w/project development

Outcomes Evaluation Methods

(see Attachment 1 - Draft Report & Appendix 2)

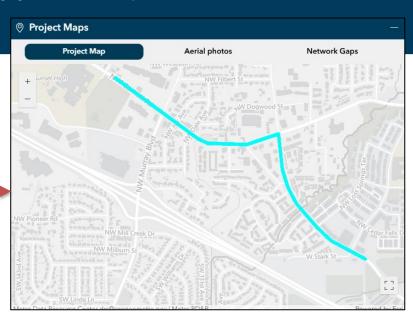

3 evaluation methods:

- GIS analysis
- If yes, then
- Scope review

CAR6. Does project identify specific Transportation System Management and Operations (TSMO) investments in the project scope?*

Review project scope. Max score of 2 points available. Score if the project scope adds new or advances existing operation of digital, smart, and/or intelligent transportation systems (ITS) infrastructure to manage existing capacity on the project roadway. Examples can include fiber optic, upgraded traffic signals, traveler information, speed reduction warnings.

CAR16. Is the project is located in an urban heat island? Reference only. No points allocated. Urban heat island defined here as 'project located in census tract in top quartile of tract urban heat index deviation from average'. GIS evaluated. No CAR17. Does the scope adds street trees or other green infrastructure to reduce heat island effects?* See response to CAR16. If marked yes, then score. Score 1 point if project includes scope elements which address urban heat effects.

Project Delivery Assessment Methods

(see Attachment 2)

Separate evaluation for application types

- Project Development
- Construction

Two evaluation categories:

- Project Management Risks
- Inherent Risks

Technical Memorandum

RE: Draft 2028-30 Regional Flexible Funds Allocation Risk Assessment

Overview

Metro's Regional Flexible Funds Allocation (RFFA) process allows local agencies to apply for federal funding, distributed through the Metro region, for local projects. Metro is evaluating the 2008-0300 RFFA project applications based on how meaning fully they can help the region a chieve the five Regional Transportation Plan goals of advancing mobility options, building a safe transportation system, building an equitable transportation network, supporting a thriving economy, and investing in climate action and resilience

Kittelson & Associates, Inc. (Kittelson) worked with Metro and the local agencies to identify and mitigate project delivery mist through the RFFA application process. Kittelson developed and applied a methodology for evaluating insist for each project application, considering the likelihood of a project being completed on budget and as outlined through the project's scope. After applying the methodology to each application, Kittelson then compiled a list of clarifying a uestions for each agency to better inform the risk assessment scoing for their application (b). Each agency was able to update their applications or provide clarification to inform the risk assessment. This memorandom summarizes the risk assessment methodology and provides or ain kevel and asymmary for each RFFA project application.

Methodology

The following section outlines the tisk assessment factors and scoring that Kittebon used to examine each RFFA project application. Additionally, the section covers the influence that the stage of project development the applicant is requesting funding for has on the project's risk. This methodology was based on a review of tisk evaluation best practices, the lessons and experiences of the project team from conducting a similar an alysis for the 2025-2027 RFFA cycle, updated to reflect changes over the last few years and applied to the pool of applications received for the 2025-2020 RFFA cycle.

In addition to this risk assessment information, future information regarding a cultural resources review is expected to be made available through Metro. That information should augment this in understanding full complexities and risks that projects may be required to novigate.

Major Risk Considerations

In considering potential risks, the project team divided project risks into two groups

 The first group, Project Management Risks, are risks that can be accounted for through project budget, with sufficient outreach and collaboration, with an adequate project scope, and/orwith an

Next Steps

Step 1A.1: Today & After

March 2025: **Select Preferred Bond Scenario**

- TPAC recommendation to JPACT: March 7th
- JPACT approval: March 20th

March – April 2025: Public Comment

Open public comment: March 24th

Step 2: After Today

March 2025: Share technical results

- Share draft results w/JPACT
- Finalize evaluation results
- Share final reports w/coordinating committees

March – April 2025: Public Comment

March 24th to April 28th

May 2025: Information for allocation package options

- Public comment summary
- Sub-regional priority indication
- Package options concepts/themes

16

Step 1A.1 & 2: Discussion Questions

- Comments/questions on draft bond scenario?
- EMCTC TAC comments to TPAC representatives on TPAC recommendation to JPACT on draft bond scenario to release for public comment?
- Questions on the Step 2 Outcomes Evaluation or Project Delivery Risk Assessment?
- Questions on Step 2 next steps?

Extra Slides

Where we are: Step 1A.1 & Step 2

Draft Bond Scenario: Step 2 Implications

Step 1A.1 - Bonds against future Regional Flexible Funds

- \$84M Step 1A.1 means \$42M for Step 2 allocation
- Future Step 2 impacted w/less \$ for through 2039

Draft Bond Scenario: Overall Performance

- 28-30 RFFA Program Direction
 - Balance performance on RTP goals/outcomes advancement
 - Investment across the region
 - Remain focused on readiness and funding leverage
- Fiscal constraint
 - Maintains financial principles
- Reflect themes, direction, input received
 - Invests in new transit categories
