Subject: JPACT Priorities for the State 2025 Transportation Package

Purpose: A shared position statement that describes Metro and the Joint Policy Advisory Committee on Transportation (JPACT) transportation values and priorities. This statement will be the foundation for our comments and engagement in processes leading up to a 2025 transportation funding package.

Background: JPACT's 2025 State Transportation Package values and priorities are rooted in conversations to date with regional partners and the 2023 update to the Regional Transportation Plan, which is a blueprint to guide investments for all forms of travel – motor vehicle, transit, bicycle and walking – and the movement of goods and freight throughout the Portland metropolitan region. The plan identifies current and future transportation needs and investments, and outlines what funds the region expects to have available over the next 25 years. The plan is updated every five years with input from community members, business and community leaders and governments as an opportunity to work together towards a future with safe, reliable and affordable travel options for all.

JPACT Priorities for a State 2025 Transportation Package:

The Portland metro area wants a safe, reliable, equitable, healthy and stable transportation system that is environmentally responsible, efficiently moves people and products to their destinations, and ensures all people can connect to the education and work opportunities they need to experience and contribute to our region's and state's economic prosperity and quality of life.

The Portland metro region accounts for more than 40 percent of the state's population. Our region continues to evolve -- working, shopping, and traveling in new ways that require expanded transportation options and solutions. Technological changes in transportation, communication and other areas are radically altering our daily lives. We are also facing urgent global and regional challenges: climate change is happening faster than predicted, and the transportation system is not fully prepared for the expected Cascadia Subduction Zone earthquake. Economic vitality and recovery depend very much on the efficiency and reliability of our transportation system, and we lack the funding at the state and local level to respond to these opportunities and challenges. For an export dependent state like Oregon, a resilient intermodal transportation system is especially critical to ensure local businesses can get their products to market. Intermodal transportation and marine highways offer a sustainable alternative for moving goods and improving overall freight mobility.

We are at a pivotal moment. As the region continues to emerge from the disruptions of the pandemic and respond to other urgent trends and challenges, the 2025 transportation package provides an opportunity for all levels of government and community to work together to deliver a better transportation future.

Our communities need:

- Short-Term Funding Solutions. Stabilize our existing state and local transportation system funding sources so we can prioritize the operations and maintenance of our existing facilities. Retain the existing 50/30/20 State Highway Fund revenue split.
- Long-Term Sustainable Funding. Invest in developing long-term, sustainable revenue solutions to provide much needed state and local operations and maintenance dollars for

multi-modal investments into the future. Ensure that local agencies continue to receive a proportional local share (50/30/20 or better) of all state collected transportation revenues. Ensure local agencies maintain and expand taxing authority for new types of funding.

- To Finish What We Started. Build government trust and accountability by ensuring the successful completion of the major bottleneck projects in the Portland metro region as promised by HB 2017.
- Safe Urban Arterials and Streets. Continue to invest in state programs that reduce fatal and serious injuries on our roadways and improve conditions on our most dangerous urban arterials. These investments should prioritize critical infrastructure improvements for all roadway users, and in major travel corridors with developing housing and job opportunities.
- Transit. Fund transit capital and operations, providing necessary solutions for expanding transit access statewide to make transit an easily accessible, attractive and equitable travel option.
- Resiliency. Ensure that our critical transportation infrastructure like airports and bridges are able to withstand large scale, known and unknown, climate and natural disasters and adapt infrastructure for the needs of future generations.

We are all committed to advancing robust and meaningful programs. Together we can create legislation that responds to the evolving economic and environmental needs across the state.
