

Resident's Emergency Card Sample

Directions: Provide residents who go into the community independently (such as work, day program and personal enjoyment) with emergency contact information for the operator, the home and other emergency phone numbers.

You can use a business card, index card or a sheet of paper, or enter this information into the resident's cell phone. Below is a sample.

If a resident goes out into the community independently, the operator should provide the resident with information about how to respond in an emergency, including emergency contact telephone numbers for the operator, the home and emergency personnel. (MCAR 023-100-817)

Sample of a Resident's Emergency Card
