Apply to join the Community Design Advisory Group for the Earthquake Ready Burnside Bridge

Images of Community Task Force members from the Environmental Review Phase.

Multnomah County is looking for volunteers to join the Community Design Advisory Group (CDAG) to support the Final Design Phase for the [Earthquake Ready Burnside](#) project. The CDAG will give the project team feedback on bridge aesthetics, including colors, materials, and lighting, as well as the shape of certain features on the bridge. The application period is open through December 4, 2022. To learn more about this opportunity and how to apply, visit the [Community Design Advisory Group Application](#).

Environmental Review Phase Wrapping Up

Thank you to the many individuals, agencies and community organizations who provided important input throughout the environmental review process. Community feedback helped the project team select the Replacement Long-Span Bridge as the Preferred Alternative. Multnomah County wants to thank the project committees, working groups and partnering agencies for their active work and engagement in this process. You can find a comprehensive [summary of public outreach](#) and input from the community in the Supplemental Draft Environmental Impact Statement, or EIS. The project team is finalizing the EIS and will kick-off the Final Design Phase in early 2023.

Conceptual rendering of the Preferred Alternative, the Replacement Long-Span Bridge. Example image showing a cable-supported bridge type option. A tied-arch bridge type option is also under consideration.
