

Table of Contents

1	Executive Summary	1-1
1.1	What is being proposed and why?.....	1-2
1.2	What are the possible solutions to meet the project purpose?.....	1-9
1.3	What would be the consequences of the different alternatives?	1-23
1.4	What was the process to select the Final EIS Preferred Alternative?	1-31
1.5	What is the Final EIS Preferred Alternative?	1-34
1.6	What federal regulatory consultation requirements were completed?	1-44
1.7	What are the unresolved issues?	1-46
1.8	How is the Final EIS organized?.....	1-48
2	Draft EIS Errata.....	2-1
3	Supplemental Draft EIS Errata	3-1
4	Supplementary Analysis and Discussion.....	4-1
4.1	Transportation.....	4-1
4.2	Parks and Recreation	4-28
4.3	Geology.....	4-28
4.4	Water Quality	4-29
4.5	Wetlands and Waters	4-29
4.6	Vegetation, Wildlife, and Aquatic Resources.....	4-29
5	Summary of Public Involvement, Agency Coordination, and Comments	5-1
5.1	Introduction	5-1
5.2	Project Groups.....	5-1
5.3	Stakeholder Outreach.....	5-6
5.4	Decision Process and Structure	5-9
5.5	Planning and Environmental Linkages	5-11
5.6	Agency Review and Coordination.....	5-12
5.7	Tribal Review and Coordination.....	5-13
5.8	Key Findings	5-14
6	Selected Preferred Alternative	6-1
6.1	Introduction	6-1
6.2	Description of the Preferred Alternative.....	6-1
6.3	Seismic Performance.....	6-12
6.4	Construction Approach	6-12
6.5	Cost Estimate.....	6-13
7	Record of Decision.....	7-1
7.1	Decision	7-2
7.2	Basis of Decision	7-3
7.3	Public and Agency Outreach	7-34

List of Figures

Figure 1-1. Frequency and Magnitude of CSZ Earthquakes.....	1-2
Figure 1-2. Project Area	1-4
Figure 1-3. Potential for Bridge and Road Structure Collapse/Failure	1-5
Figure 1-4. Simulation of Existing Burnside Bridge after a CSZ Earthquake.....	1-6
Figure 1-5. Range of Potential Crossing Types Evaluated in the Feasibility Study	1-8
Figure 1-6. Enhanced Seismic Retrofit Alternative.....	1-10
Figure 1-7. Enhanced Seismic Retrofit Alternative – Structures Replaced and Retrofitted.....	1-11
Figure 1-8. Lane Configurations for the Draft EIS Alternatives	1-12
Figure 1-9. Replacement Alternative Short-Span Approach	1-14
Figure 1-10. Replacement Alternative with Long-Span Approach	1-15
Figure 1-11. Replacement Alternative with Couch Extension	1-16
Figure 1-12. Replacement Alternative – Refined Long-Span Alternative.....	1-18
Figure 1-13. Refined Long-Span Alternative Lane Configuration Options	1-19
Figure 1-14. Full Closure of Bridge During Construction.....	1-21
Figure 1-15. Build Alternatives’ Bridge Supports Located in Geologic Hazard Zones.....	1-24
Figure 1-16. Preferred Alternative Lane Configuration Options (West Approach Shown).....	1-31
Figure 1-17. Preferred Alternative with TriMet Bus Dwell Space and Eastbound Traffic Queue Length	1-33
Figure 1-18. Preferred Alternative with Bascule Movable Span (Tied-Arch East Approach).....	1-35
Figure 1-19. Preferred Alternative with Bascule Movable Span (Cable-Stayed East Approach)	1-35
Figure 4-1. Updated Pedestrian Detour Route for the Burnside Bridge Closure	4-3
Figure 4-2. Pedestrian Detour Route for the Vera Katz Eastbank Esplanade Closure.....	4-4
Figure 4-3. Pedestrian Detour Route for the Waterfront Park Trail Closure	4-5
Figure 4-4. Bicycling Detour Route for the Burnside Bridge Closure	4-7
Figure 4-5. Bicycling Detour Route for the Vera Katz Eastbank Esplanade Closure.....	4-9
Figure 4-6. Bicycling Detour Route for the Waterfront Park Trail Closure	4-10
Figure 4-7. Potential Eastbound PM Peak Hour Traffic Dispersion Around the Burnside Bridge Closure	4-12
Figure 4-8. Potential Westbound AM Peak Hour Traffic Dispersion Around the Burnside Bridge Closure	4-13
Figure 4-9. Updated General-Purpose Traffic Detour Route – Option A	4-16
Figure 4-10. Updated General-Purpose Traffic Detour Route – Option B	4-17
Figure 4-11. Updated Bus Traffic Detour Route.....	4-19
Figure 5-1. Outreach by the Numbers	5-6
Figure 5-2. Decision-Making Structure	5-9
Figure 5-3. Public Involvement Process.....	5-10
Figure 6-1. Preferred Alternative Lane Configuration Options (West Approach Shown).....	6-2
Figure 6-2. Preferred Alternative with TriMet Bus Dwell Space and Eastbound Traffic Queue Length....	6-3
Figure 6-3. Existing View – Looking South from the Japanese American Historical Plaza in Gov. Tom McCall Waterfront Park	6-4
Figure 6-4. Existing View – Looking North in Gov. Tom McCall Waterfront Park.....	6-5
Figure 6-5. Preferred Alternate West Approach Girder – Looking South from the Japanese American Historical Plaza in Gov. Tom McCall Waterfront Park	6-5
Figure 6-6. Preferred Alternative West Approach Girder – Looking North in Gov. Tom McCall Waterfront Park.....	6-6
Figure 6-7. Preferred Alternative with Bascule Movable Span (Tied-Arch East Approach).....	6-7
Figure 6-8. Preferred Alternative with Bascule Movable Span (Cable-Stayed East Approach)	6-7

Figure 6-9. Refined Tied-Arch Option 2 – West Side of East 2nd Avenue 6-8
 Figure 6-10. Preferred Alternative Areas of Temporary Construction Impacts 6-14
