

# Burnside Rd

CLEVELAND AVE TO POWELL BLVD

Traffic volumes on Burnside Rd range from 26,000 vehicles per day near Cleveland Ave to 37,000 near Powell Blvd. The posted speed limit is 35 mph. **The corridor has seen a high number of crashes**, including pedestrian crashes, rear-end, and angle crashes.

Community members have shared **concerns about speeding** and **reported feeling unsafe walking and biking**, especially near Hogan Dr and Burnside Rd Pedestrians often face challenges with **drivers not yielding at intersections**, and there is a **general lack of safe crossing options along the corridor**.

Corridor-wide Safety Concerns	Safety Improvement Options	Site Specific Recommendations
<i>Speeding</i>	 <b>Construct medians</b>	 <b>Raised crosswalk across right turn slip lane</b>
	 <b>Lower speed limit</b>	 <b>Right on red restriction</b>
<i>Distant pedestrian crossings</i>	 <b>Enhanced pedestrian crossings</b>	 <b>Intersection geometry reconfiguration</b>
<i>Uncomfortable bike lanes</i>	 <b>Separated/protected bicycle lane</b>	 <b>ADA improvements</b>
<i>Indistinct bike lane crossings</i>	 <b>Bicycle conflict striping</b>	
<i>Non-bicycle-safe storm drains in bike lane</i>	 <b>Roadway surface improvements</b>	
<i>Signalized intersection conflicts</i>	 <b>See summary of safety improvement options for signalized intersections (on separate page)</b>
